**Review-feedback
for the educational and scientific programme "Ecology"
of the third level of higher education
at Petro Mohyla Black Sea National University, Mykolaiv, Ukraine**

Petro Mohyla Black Sea National University has been learning ecologists for a long time. Training of ecologists-bachelors, ecologists-masters and PhD in ecology is carried out. Since 2016, PhD learning in ecology has been carried out.

The Department of Ecology employs highly experienced professionals, doctors of sciences, professors, who provide training of doctors of philosophy in ecology.

This educational and scientific programme (ESP) "Ecology" of the third level of education in the specialty "Ecology" was developed by scientists of the Department of Ecology of Petro Mohyla Black Sea National University, who have been training environmental professionals for a long time.

The educational and scientific programme determines: the goal, program characteristics, teaching, learning and assessment of learning outcomes, programme competencies (integrated, general, special), programme learning outcomes.

The educational and scientific programme contains a system of educational components that are built in a logical sequence, contains components of practical and scientific training of applicants. In general, this allows us to train specialists of the educational level "Doctor of Philosophy" in the specialty "Ecology" and will ensure the formation of a number of relevant professional competencies.

The main educational components of professional training are Environmental projects and international cooperation in ecology; Environmental studies; Environmental monitoring and green technologies; Geoinformation Analysis and Modeling in Ecology. These components allow you to acquire the necessary professional competencies. Elective disciplines of the professional block also allow the applicant to improve knowledge and acquire new competencies.

We recommend the educational and scientific programme "Ecology" of the third level of higher education for implementation in the educational process of Petro Mohyla Black Sea National University.
