LETTER OF SUPPORT

The Institute of Polymers of the Bulgarian Academy of Sciences has extensive experience in the production of polymer composite materials using various methods. Prof. Dinzhos Roman has developed a new method of producing polymer composite materials that are more energy efficient than those that exist now. The results of joint research are used in the scientific activities of the Institute of Polymers of the BAS in the implementation of various European grant programs.

Prof. DSi. Petar Petrov
Director of the Institute of Polymers
